## EDUCATION

<b>Master's Degree in Computer Science, Cybersecurity - University of Trento</b> <i>Expected graduation in October 2025.</i>	Trento, Italy <i>Sep. 2023 – Present</i>
<b>Bachelor's Degree in Computer Engineering - University of Trento</b> <i>Graduated with a final grade of 108/110.</i>	Trento, Italy <i>Sep. 2020 – Sep. 2023</i>

## EXPERIENCE

<b>Software Engineer Intern - Embedded Systems</b> <i>University of Trento</i>	Feb. 2023 – Jun. 2024 <i>Trento, Italy</i>
<ul style="list-style-type: none"><li>Validated <b>SPARK SR1020 UWB IoT devices</b> against their specifications, ensuring reliability and readiness for system integration.</li><li>Enhanced real-time <b>UWB communication for music streaming</b> by developing and optimizing <b>C-based software</b>, achieving a <b>50% faster response time</b>.</li><li>Improved system performance by building a <b>Python script</b> to analyze <b>audio packet behavior</b>, providing insights to refine the <b>IoT software</b>.</li><li>Demonstrated strong <b>teamwork</b> and <b>problem-solving skills</b> by collaborating with a team of <b>10 members</b> in a <b>multidisciplinary environment</b> to develop IoT-based solutions.</li></ul>	
<b>Software Developer</b> <i>Fiverr</i>	Oct. 2022 – Oct. 2023 <i>Remote</i>
<ul style="list-style-type: none"><li>Developed custom software applications in <b>C/C++</b>, <b>Python</b>, and <b>Java</b> for different client needs.</li><li>Managed projects for over <b>60 clients</b>, ensuring timely delivery and high-quality results.</li><li>Maintained a <b>100% delivery rate</b> and a perfect <b>5/5 customer satisfaction rating</b>.</li></ul>	

## PROJECTS

### Phantom Wallet API Integration | *Python, RESTful APIs*

- Developed an **unofficial Python library** to interact with the **Phantom Wallet backend API**.
- Implemented and tested key functionalities, including **wallet insights**, **token data retrieval**, **trending asset information**, and **learning resources and quests**.
- Designed the library to support multiple blockchain networks, including **Solana**, **Ethereum**, **Base**, **Sui**, **Polygon**, and **Bitcoin**, ensuring **compatibility** and **scalability** across multiple ecosystems.

### Domain Shift Adaptation with MEMO | *PyTorch, Scikit-learn, NumPy*

- Applied **Test-Time Adaptation (TTA)** techniques to improve the **robustness** of a pre-trained neural network on test images.
- Implemented **Marginal Entropy Minimization (MEMO)**, achieving an improvement of **over 3%** in overall performance.

### Security Testing Analysis for an E-commerce Platform

- Conducted a comprehensive **static and dynamic security analysis** using **SpotBugs** and **ZAP**.
- Identified and prioritized over **15 potential vulnerabilities**, including **SQL Injection**, **XSS**, and **CSRF**, as part of a structured **vulnerability management process**.
- Provided a working solution for each vulnerability, **improving the platform's security posture** and reducing potential attack vectors.

## PUBLICATIONS

<b>Real-time Musical Haptics with Ultra-wideband: A Study on Latency, Reliability, and Perception</b> <i>L. Turchet, C. Sassi, D. Vecchia, G. Picco</i> — Published in IEEE Transactions on Haptics on January 6, 2025.

## TECHNICAL SKILLS

**Languages:** Italian, English  
**Programming languages:** Python, C/C++, Rust, Java, JavaScript, HTML/CSS, SQL  
**Security Skills:** Injection Attacks, Cryptography, Pwn, Reverse Engineering, Web Security
